- Broadcast anything live over the internet using Crime-Seen's unique dual MPEG4 compression (2-5kb) per frame

Launched at Interbuild UK  
NEC, Birmingham 2006

# Easy to Install and Operate, with Multi Usage Options

Performs Real Time Display & Recording 100fps PAL even in a low PC spec with USB1.1 or 2.0 due to our unique dual MPEG4 compression.

Maintains stability through the windows platform and is ultra bandwidth efficient for volume data transmission.

USB plug and play for flexibility at all times

Minimises HDD recording space and with it operating on narrow network bandwidth with MPEG4 to hardware and software. Averages 3kb per frame (compare to any still image size).

No other product allows for performance of this level for high speed volume video/audio data transmission over LAN or WAN.

Will operate and integrate with existing cameras to allow for easy low cost upgrade solution.
